SOFTWARE, HARDWARE & SERVICES

BUDGET, FREE

Businesses can never be budget-free, but they can get budget software for free, now that Adaptive Planning has put its new Adaptive Planning Express Edition online. The entry-level, on-demand software lets companies move beyond Excel-based (or worse, manual) spreadsheets with no fees, no restrictions on how long they use it, and access for up to 50 users. And if they like it, they can include a line in their next budget to upgrade to Adaptive Planning's more full-featured commercial versions, which start at less than \$500 per user.
